

September 4, 2007

Dear Valued Customer:

Teleflex Medical continues to prepare our new enterprise resource program (ERP) as part of the process of becoming a single entity – Teleflex Medical Incorporated.

We are very happy to announce October 8, 2007 as the implementation date for our new ERP. **To facilitate a clean transition of our data infrastructure, it will be necessary to temporarily suspend our operations, beginning September 28 at 7:00 p.m. EDT and ending on October 8 at 8:00 a.m. EDT. During this period, we will not be receiving or shipping orders for Teleflex Medical products (i.e. Teleflex Medical Products sold under the brand names listed below). Because of this, we ask that you please ensure that your inventory levels for all Teleflex Medical products are adequate to bridge the timeframe between September 28 and October 8.** To assure that your orders are processed prior to our business system cutover, please submit your order requirements by 8:00 p.m. EST on Thursday, September 27.

We are working to minimize disruptions to customer purchases during the initial start-up period and appreciate your continued support. **We will resume receiving and shipping of orders at 8:00 a.m. EST on Monday, October 8.** At that time, you will be able to conduct business with us as you always have.

Please note that we will assign a new, single customer number to each customer after the implementation. We will communicate more information on this at a later date. Until then, please continue to order products from us using your existing customer number as you have in the past.

We appreciate your ongoing support as we approach our implementation date. If you have any questions, comments or concerns, please contact our Customer Service Representatives, who will be able to assist with answers to your questions. As always, please feel free to contact us at askteleflexmedical@teleflexmedical.com.

Sincerely,

Tim Hopper
VP/General Manager
Medical Products Division
Teleflex Medical

Jens Boy
VP/General Manager
Surgical Products Division
Teleflex Medical
